Scan to find a Juliana dealer

Juliana Group is a leading global supplier of quality residential greenhouses. The company was founded in 1963 by Mogens A. Stærmosé in Odense, Denmark. The family-owned company is now owned by the third generation, Nikolaj Stærmosé. Headquarters and production remain based in Odense, with subsidiaries in the UK and Germany.

Juliana Group exports to more than 20 countries. We help people grow – that's the essence of everything we do.

Our three brands Halls, Juliana, and Gabriel Ash offer greenhouses for every dream, experience, and garden, with functional solutions in uncompromising quality and design. We create the framework for outdoor

experiences – whether you want to grow tomatoes, unwind in the garden, or create your very own garden space. Although we are rooted in a long-standing tradition, we're curious about the future and continuously work to improve our greenhouses and accessories. Read more at Juliana.com and explore our universe filled with inspiration for your current or future greenhouse life.

GROW THE POSSIBILITIES

You take great delight in tending to your plants, especially when you're able to hold in your hands the fruits of your labour — perhaps even a rare, or heritage variety of tomato.

While others might not share your enthusiasm for gardening, they do enjoy relaxing with a glass of red wine in a cosy outdoor setting — or would love to experiment with brush and colour in the soft natural light of the garden.

So, you've settled on a Juliana greenhouse. It's the perfect balance — offering a quality structure that's just the right size to grow your tomatoes and herbs, while also providing a little nook for an easel to sit comfortably. It's a place where both of you can enjoy your passions in harmony.

Grand Oase on dwarf wall · 13,0 m²

A Juliana greenhouse isn't just for growing. It's for living. It's for unwinding. It's for finding calm and connection—in your garden, in your own green sanctuary. In this catalogue, you'll discover the many possibilities Juliana has to offer. Find the greenhouse that perfectly suits your garden, your wishes and your needs.

A Juliana greenhouse is *designed and manufactured in Denmark* and brings together aesthetics and practicality in every detail.

They feature *strong aluminium profiles* for lasting durability and *polycarbonate or toughened glass in full-length panes*, ensuring optimal growing conditions.

You'll enjoy *efficient ventilation* with roof and side vents and a stable door, keeping your plants thriving and the space comfortable for you too.

The *low threshold* makes access easy — whether you're carrying a watering can or a tray of drinks.

We back it all with a *12-year warranty*, because true quality stands the test of time.

GROW TIMELESS TRADITIONS

Juliana Jubii 60 was designed with features from our favourite models in mind and offers a spacious garden room with lots of space for your greenhouse dreams.

The high eaves has made it possible to place the double stable door on the long side, while retaining the classic greenhouse shape and the option for roof embellishment. The spacious feeling provides ample room for both people and plants.

As a special feature, the profiles of the greenhouse are black lacquered, just like the doors and windows

Juliana Jubii 60 was introduced as a special anniversary model in celebration of Juliana's 60th anniversary in 2023. This greenhouse model has quickly become a bestseller, which is why it was developed in yet another size, to make the beautiful model accessible to all types of gardens.

Jubii 60	Width	Length	Eaves*	Ridge*	Door width	Door height	Roof vents
10,9 m ²	2959 mm	3677 mm	1947 mm	2869 mm	1360 mm	1880 mm	4
15,1 m ²	2959 mm	5113 mm	1947 mm	2869 mm	1360 mm	1880 mm	6

*The stated height is incl. 120 mm base. We always recommend buying a Juliana base with your greenhouse. Additional information can be found on page 39.

GROW FRESH FLAVOURS AT HOME

The Juliana Oase is for those seeking a unique, high-ceilinged garden room. It provides space for unfurling and room for creativity.

Experiment with herbs in pots or with clusters of grapes. Pick melons, lemons and kiwis while creating a lovely atmosphere. Or create your own space for reflection.

The possibilities in this square-shaped greenhouse are almost endless. The double stable doors, paired with two side vents and the ventilation cowl, provide optimal air circulation.

The cowl features wax-filled cylinders that open automatically as the temperature increases.

The sky is the limit in this greenhouse oozing with atmosphere. In a Juliana Oase, aesthetics and functionality converge in perfect harmony and will fulfill your gardening dreams for years to come. Let your soul take root and enjoy your budding vegetables.

DREAMING OF A GREENHOUSE ...

In each garden, the dream of a greenhouse is different and unique. Do you dream of a greenhouse full of vegetables, herbs and colourful flowers? Or a unique outdoor venue with room for relaxation and socialising, or a quiet mindful space? With a Juliana Grand Oase in your garden there is room for everything.

In a Juliana Grand Oase there is room to lengthen the seasons. In early spring, only a few rays of sun are needed to make the greenhouse a warm haven. During the summer, the greenhouse can be perfect for the late evening hours, even when the dew falls. And when the sun loses its power in late summer, you can extend the season well into autumn and have wonderful days in the greenhouse.

In a spacious Juliana Grand Oase there is room for your dreams.

Room for big
greenhouse
dreams

GROW A LONGER GREENHOUSE SEASON

The Juliana Grand Oase is the perfect choice for gardeners with big greenhouse plans. There is plenty of room for all of the family's growing projects as well as a space to relax and enjoy the view of the garden.

In the Grand Oase the double stable doors are located on the long side of the greenhouse, creating an airy feel and easy access thanks to the low threshold.

The sides are almost two metres high and together with the hipped roof structure, the greenhouse offers plenty of space.

You can easily divide the space with cultivation on one side and a seating area in the other and enjoy easy access to both.

GROW WITH WARMTH FROM THE WALL

The Juliana lean-to greenhouse is for anyone with an unused wall in the garden. Leaning a greenhouse against a house enables both structures to be heated by the sun during the day. At night, the wall emits heat to the greenhouse, thereby creating excellent conditions for growth during the entire

growing season. Extend the summer with this extra source of heat and settle down in a deck chair in early spring or enjoy the last rays of summer as the leaves turn brown in autumn.

GROW BEAUTY IN SMALL SPACES

The Juliana Urban City Greenhouse is the modern answer to urban gardening. This compact greenhouse is designed for city living – where space may be limited, but the dream of homegrown herbs and salads is anything but small.

Perfect for balconies, small terraces or courtyards, the Urban model requires no base or permanent installation.

It features toughened glass and two adjustable shelves that provide flexibility in how you organise your plants. The frame is made from black powder-coated aluminium, combining durability with a sleek, modern look that fits beautifully into urban environments.

Practical storage including two adjustable shelves

 Item no. F04842.

Capillary Watering-Box Planter

The planter is ideal for use both inside and outside the greenhouse. The two-piece lid also conceals capillary watering boxes from above.
 950 x 556 x 367 mm.
 Item no. F04562.

ACCESSORIES

Grow the Possibilities

Univent Window Opener

Juliana has different window openers that can automatically ventilate the greenhouse when it gets too hot inside. One of them is Univent, which is well-suited for both glass and polycarbonate sheeting.

Item no. F04031 - alu. Item no. F04040 - black.

Water Butt

The water butt can hold 100 litres of rainwater. Besides its elegant design, the butt has a practical water tap.

Item no. F04561.

Vanlet Irrigation Unit

Automatic watering and fertilising system. Distributes water and fertiliser to plants through feed hoses, Y-shaped branch pipes and drippers. Capacity: 10-150 litres of water a day. Item no. F04201

Tablet Holder

Use your tablet in the greenhouse to read garden and greenhouse articles and find inspiration on your favorite websites. The holder is placed on the special bracket which is easily mounted in the greenhouse profiles. Including mounting brackets. Item no. F04849.

Soil Thermometer

Some plants, like cucumbers, require the temperature of the soil to rise to 18°C. Item no. F04351.

Min-Max Thermometer

A minimum-maximum thermometer that can be bolted into the greenhouse profile. Item no. F04355.

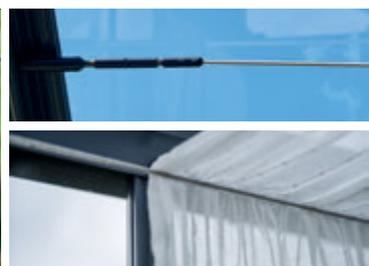

Plant Rings

Ideal for attaching and supporting plants throughout the greenhouse. Attach to the greenhouse frame with a simple twist. Item no. F04711.

Greenhouse Wire Set

A set of 2 wires to enable the fixing of shading or the training of vines inside the greenhouse. Item no. F04848.

Ventomax Window Opener

Automatic galvanised-steel window opener. Best suited for glass. Can be set to open/close between 16°C and 25°C. Item no. F04011.

Nut Caps

Small plastic caps that cover the nuts that hold the profiles together. Creates a tidy finish and protects against rust. Pack of 20 pcs. Item no. F04846

Roller Blinds

The roller blinds are attached directly to the glass with suction pads and can easily be moved to a new location. Item no. F04847.

Green Shading Net

Ensures fast, efficient greenhouse shading. 1500 x 3700 mm. Item no. R04082. 1830 x 2590 mm. Item no. R04085.

Juliana Shade Paste

Apply the paste to the exterior with a roller or brush. It protects plants from being scorched when the sun is hottest. Item no. F04805.

Aluminium Brackets

Used for supporting plants in the greenhouse, etc. Attach with cropped bolts, which enable it to bear a heavier load. Pack of 10 pcs. Item no. F04716.

Suspension Hooks

A set of 4 versatile suspension hooks to help organise the greenhouse. Item no. F04845.

Greenhouse Heater

Paraffin greenhouse heater with a capacity of 3.6 L will heat up to 15 m². Item no. F04453.

3

DANISH DESIGN · FUNCTIONAL AESTHETICS · GR

1 · Gutter with Leaf Guard

The integrated leaf guard prevents leaves from building up in the gutter and ensures easy cleaning of the downpipes and gutter. The downpipe has a diameter of 40 mm.

2 · Low threshold for easy access

The door has a low threshold, which levels the entrance and provides easy access for wheelchairs, wheelbarrows and small carts.

3 · Double stable door

Close the lower parts of the stable door to keep uninvited animals away and to keep uninvited animals away and the upper part open for ventilation.

4 · Intelligent construction

The roof pitch is 30 degrees to ensure an optimal influx of light for growing on the North European latitudes.

5 · Door handle with integrated lock

The door has a door handle in stainless steel with an integrated lock.

6 · Details that provide the finishing touch

Metal fittings, cover plates, nut protectors etc., complete the greenhouse.

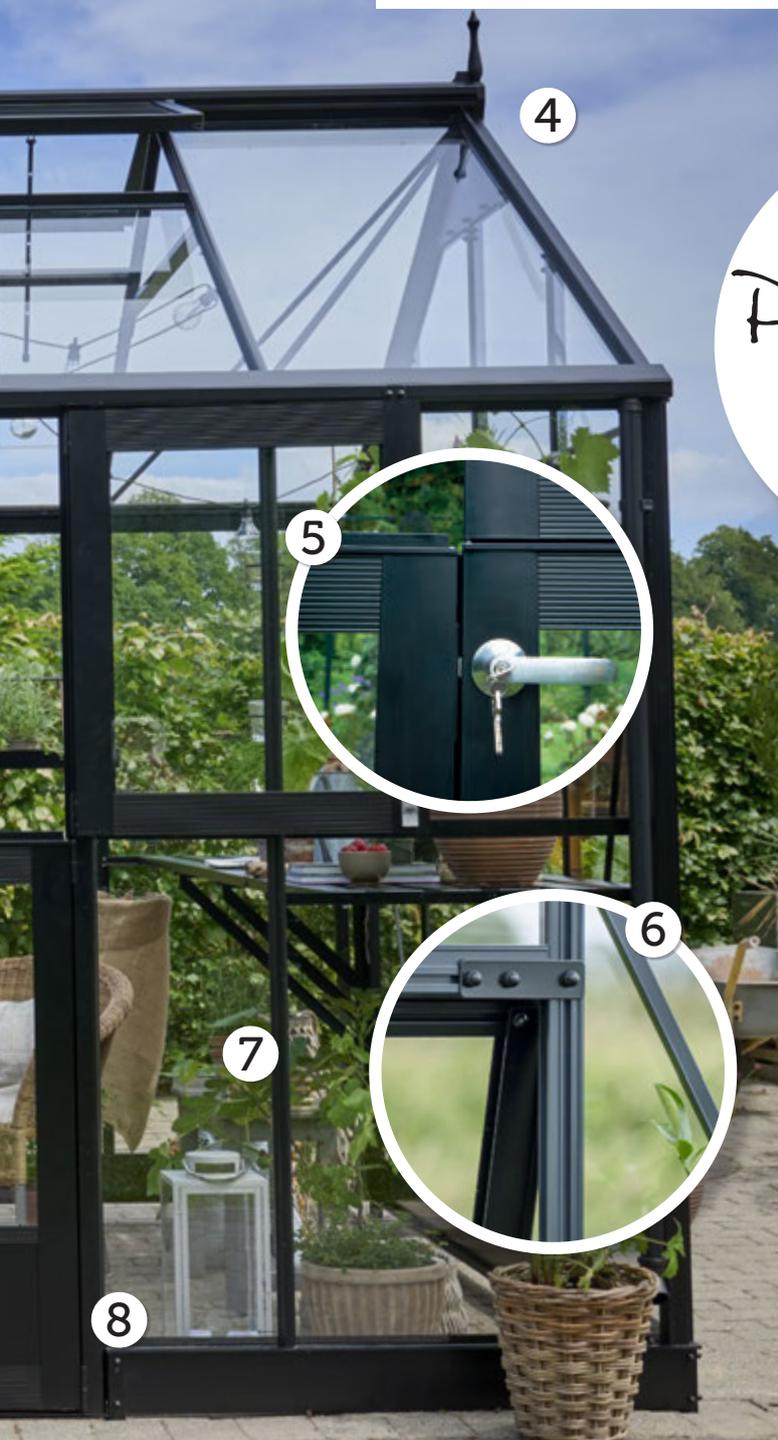

7 · Full-length toughened glass gives a sleek finish

Toughened glass in full-length, secured with glazing capping, creates a beautiful finish without traditional glass overlaps or glass clips.

8. Strong aluminium profiles

The robust profile construction supports the fact that the greenhouses are developed and tested for Scandinavian weather conditions. When toughened glass or polycarbonate panels are glued to the profiles with silicone, significant strength is achieved, helping to stabilize the entire structure and make the greenhouse extra strong. The powder-coated profiles undergo continuous tests, meeting internationally recognised standards and are covered by our 12-year warranty. You can read the full warranty statement on [Juliana.com](https://www.juliana.com)

MADE IN
DENMARK

Danish
Production
since 1963

HOW THE POSSIBILITIES

A Juliana greenhouse is based on the principles of Danish design: simplicity, aesthetics, and functionality – from idea to finished product.

With expert craftsmanship and quality materials, we produce functional and robust greenhouses that can withstand wind, weather and generations of use.

9. Intelligent and elegant ventilation

The cowl on the Oase and Grand Oase has beeswax-filled cylinders. The heat in the greenhouse expands the beeswax in the cylinders, and the cowl is raised and ensures the necessary ventilation.

BEFORE BUYING A GREENHOUSE

A greenhouse is typically a long-term fixture in the garden, so it's important to determine what best meets your needs and preferences.

Consider Both Footprint and Height

When selecting a greenhouse, it's important to consider not just the footprint but the height as well. A greenhouse with an eaves height of at least 1500 mm and a total height of more than 2000 mm creates a spacious environment, allowing you to stand upright while working with your plants or using it as a relaxation space. While the size of your garden will influence your decision, it's essential to clarify how you intend to use the greenhouse. Will it be a sanctuary for relaxation, a place to grow vegetables, or a combination of both?

Space for Growing and Entertaining

If you plan to host family dinners when the weather doesn't permit outdoor dining, you may need extra space. However, even a smaller greenhouse can accommodate a dining area if the space is used wisely. The crops you wish to grow are equally important. Certain plants, like melons, require more space, and many people underestimate how much room they'll need. Once you start enjoying home-grown tomatoes and cucumbers, you may find yourself wanting more space. Consider whether you'll focus on smaller herbs or opt for larger, more space-demanding crops.

Selecting the Ideal Greenhouse Shape for Your Garden

Greenhouses come in many shapes. While the classic rectangular design is the most common, other options include lean-to and pavilion or orangery styles. Plants like tomatoes will thrive equally well, no matter the shape of the greenhouse. Ultimately, the choice of shape comes down to your personal style preferences and how you envision the structure fitting into your garden.

Glass and Polycarbonate

Glass offers the most elegant appearance, while polycarbonate is the more practical option. Toughened glass has the added benefit of crumbling into small, blunt pieces if it breaks, unlike traditional greenhouse glass, which shatters into sharp fragments. Polycarbonate, on the other hand, provides insulation, helping to balance temperature fluctuations between day and night, making it easier to keep your greenhouse frost-free during winter.

In the Juliana range, all models are available with full-length toughened glass, and some models are also offered with polycarbonate. The full-length design eliminates the issue of algae growth, which often occurs with over-lapping glass. Toughened glass is also much stronger than standard greenhouse glass. Our 3 mm toughened glass provides durability and flexibility against impacts, as shown in this video demonstrating the strength of our glass options.

Scan QR

Additionally, when the glass is bonded to the frame with silicone, it further stabilizes the structure, ensuring a robust greenhouse capable of withstanding various environmental challenges.

A Good Base is Important

For optimal stability and to install the door construction at ground level, you need a base for your greenhouse. With a suitable Juliana base for your Juliana greenhouse, the respective door construction will be perfectly integrated. Additionally, a Juliana base, with its integrated ground anchors, provides excellent stability for your greenhouse. Therefore, we recommend purchasing a Juliana base, as this ensures the door construction is perfectly integrated and gives your greenhouse the best possible stability.

It is generally also possible to build your own base for the greenhouse. However, you should pay close attention to the stability and height of your base to ensure the correct alignment with the door construction. Please note that most insurance companies only cover damages if a suitable base has been correctly installed and anchored into the ground.

With or Without Dwarf Wall

Grand Oase 13,0 and 18,8 as well as Premium 13,0 are also available with shortened profiles, allowing you to establish the greenhouse with a fixed base. See pages 14-15 and 20-25. You will need to establish the base yourself and build a wall to anchor the greenhouse. Materials for the wall solution are not included with the greenhouse. The wall is a 'build-it-yourself project' before the greenhouse can be assembled.

Building Permit

For building permission in relation to greenhouses, we recommend that you investigate local regulations.

ASSEMBLY

Assembling a Juliana greenhouse can be a 'do-it-yourself' task. Alternatively, if preferred, you can hire skilled workers to take care of this for you.

If you choose to complete the installation work yourself, you would

usually have to spend 2-3 days with a 'normal' greenhouse, and you must plan the task realistically.

E.g. place the base firmly on a level surface and wait for the concrete to dry before starting any assembly work.

At **Juliana.com (Help & Support)** you will find videos that will help you through the construction process.

See more about greenhouse assembly and find the latest assembly instructions at **Juliana.com.**

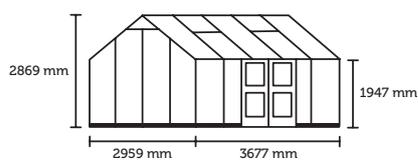

OVERVIEW

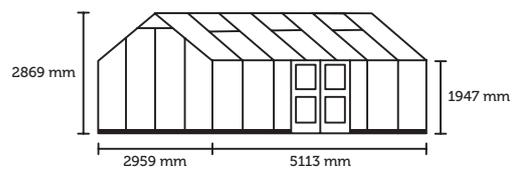

Grow the Possibilities

FIND YOUR GREENHOUSE

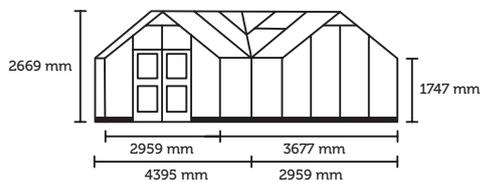

On the following pages, you'll find line drawings with the measurements for every Juliana greenhouse model – along with a full overview of specifications and relevant item numbers. Everything you need to choose the greenhouse that fits your garden and your needs perfectly.

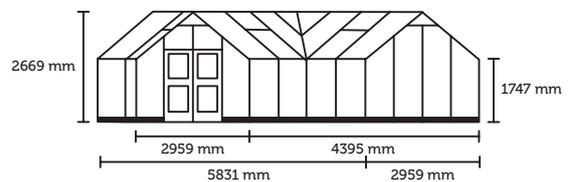

JUBII 60 · 10,9 m²

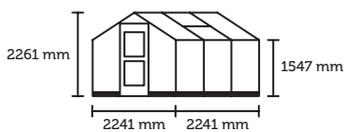

JUBII 60 · 15,1 m²

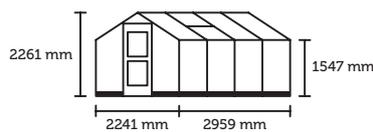

ORANGERI · 15,1 m²

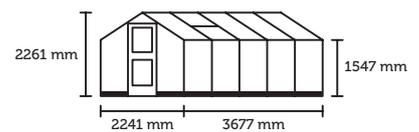

ORANGERI · 21,5 m²

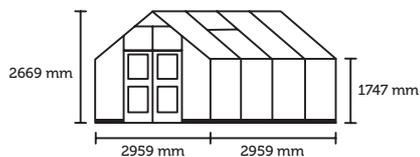

COMPACT · 5,0 m²
